

wiDock

wireless dock for iPod®

SX-DAD002

Perfect for

iPod® nano

iPod® mini

iPod®

Free the iPod® - Give it a home!

For the first time wiDock allows wireless synchronisation of your iPod with iTunes on a PC or Mac - and lets you simultaneously integrate the iPod into your home entertainment system!

wiDock combines all of the advantages of known docking stations - charging, support of Apple's infrared remote control, iPod connection to stereo and TV, compatibility with all dockable iPod models - and connects your iPod via WLAN to your computer.

Now you can transfer music, videos and the latest podcasts to your iPod from any room of your house at the push of a button.

Advantages

- ⊙ Hi-Speed WLAN support for wireless connection to PC or Mac
- ⊙ iPod connection to stereo system, active speakers, earphones, video devices, TV
- ⊙ High security on wireless LAN
- ⊙ Alternate use with wired LAN
- ⊙ Manages up to 5 iPods
- ⊙ iPod charging station
- ⊙ Supports Apple Remote Control
- ⊙ Compatible with all docking-capable iPod models
- ⊙ Easy to configure and operate
- ⊙ Supported operating systems: Windows XP/2000/Vista, Mac OS X 10.2.7-10.4.7
- ⊙ "Made for iPod": Certificate for Apple-approved quality
- ⊙ Colours: white, black

Wireless Synchronisation

Home Entertainment Connections

iPod®- Charging Station

Free the iPod® - Give it a home!

Features

The wiDock is a unique solution allowing you to integrate your iPod into your home entertainment system and to simultaneously establish a wireless connection to your PC or Mac to load music from your PC or Mac into the iPod without having to switch cables. Synchronisation is wireless, i.e. you can transfer music, podcasts, and videos from stereos, TV's , desktop computers or laptops from anywhere inside your home.

Use the S-video output and the audio interface to share your favourite tunes, videos or podcasts on your stereo or TV via the wiDock with friends and family. Audio cable included.

802.11b/g Standard for wireless connection to your PC or Mac. All you have to do is press the wiDock's synchronization button for the docked iPod to synchronise with iTunes on your computer. Just keep in mind that the wireless transfer is slower than a wired USB connection.

Manage up to 5 iPods. The wiDock synchronizes each docked iPod automatically to its own pre-configured computer (computer to link). That means that every member of the family can use the wiDock to update their own iPod with the latest songs, podcasts and videos from their own iTunes library.

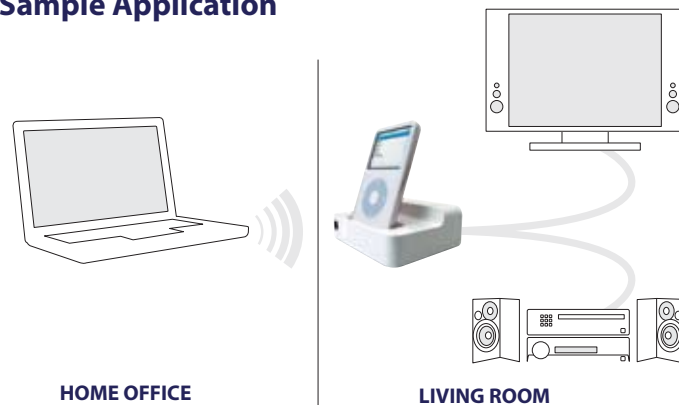

Easy to install. The installation wizard on the included CD-ROM makes it very easy to configure the wiDock. Installation requires only a few mouse clicks.

iPod charging station. When the wiDock is connected to a power source the docked iPod is being charged.

SILEX-Facts and Special Services

SILEX TECHNOLOGY can look back on more than 30 years of experience and quality. Many leading manufacturers of IT peripherals utilize SILEX TECHNOLOGY's networking technology as OEM (Original Equipment Manufacturer) components for their own products. Products like **print servers**, **USB servers** or **serial device servers** as well as **biometric products** or this unique wireless **iPod solution** offer you your own choice of SILEX products to explore their advantages and experience the quality leading manufacturers have been trusting for many years.

SILEX TECHNOLOGY is also known for its outstanding services. Every SILEX product is backed by SILEX TECHNOLOGY's **lifetime support**. For high-quality products as these, this is an easy task. The services are free and available to our customers through the following communication channels: free **telephone support**, **e-mail support** as well as online support. The online support function is available in situations that require additional explanations. The SILEX support technician connects remotely to your system and shows you directly on your display how to implement the solution. You can also at any time participate in the ongoing development of SILEX products. Firmware upgrades are available to you for downloading from our website free of charge.

Specifications

| | |
|-----------------------------|---|
| Wireless LAN | IEEE802.11b/g |
| Wireless Security | WPA2 (AES), WPA (TKIP/AES), WEP (64/128bit) |
