

Connecting USB devices to a Local Area Network

The *SX-2000U2* and *SX-2000WG* are unique USB device servers that allow you to use, besides other USB devices, many functions of Multi-Function Printers with USB 2.0 Hi-Speed on the network.

Print, scan, fax or store over the network. – The *SILEX USB device servers* make working with Multi-Function Printers in a network very simple. They also allow integrating and working with various USB devices such as scanners, printers, storage devices, digital cameras and other USB-enabled products in a network environment. When connecting a USB hub, the device servers can manage up to 15 USB connections. After installation, all network users can share all the integrated USB devices. A user connects to one of the devices and is able to access the device as if it were connected directly to the workstation.

The *SILEX USB device servers* support status monitoring as well as managing and controlling the functions of the attached devices, depending on the individual capabilities of each attached USB device.

Furthermore, it is very user-friendly – installation with the bundled utility *SX Virtual Link* is intuitive and easily completed. The software has multi-language support for English, French, German, Italian, Portuguese, Spanish, Chinese and Japanese.

Additionally, the *SX-2000WG* can be used wirelessly.

More detailed information about the manufacturer

SILEX corporate headquarters is in Osaka, Japan. There are offices in the USA, China and Europe (Germany), whereby local development needs can be customized to each particular market. Furthermore, silex technology can offer instruction and technical support in local languages.

SILEX TECHNOLOGY is a global market leader in embedded network technology, especially print and device servers. SILEX TECHNOLOGY customers include many of the leading printer manufacturers in the world.

With the SILEX brand of print servers and USB device servers, SILEX's product portfolio offers a wide range of solutions to meet a wide range of customer needs.

SILEX TECHNOLOGY stands for quality as well as easy and intuitive installation and operation. With the bundled utilities, installing the devices is very easy, even for inexperienced users. High quality is ensured because SILEX TECHNOLOGY can look back on more than 30 years of experience, where only well-engineered products are brought to market and every device is 100% inspected before leaving the factory.
