

Information for Customers and Partners

On December 23, 2005 silex technology america, Inc. acquired the "Wireless & Connectivity Solutions" business from the American TROY Group, Inc. This also includes all assets and related business activities of the European TROY GmbH, Herrenberg, Germany.

As a manufacturer of print servers, USB device servers and biometric finger print authentication systems silex technology intends to continue the TROY product lines of print and serial servers, BinTec and TROYgate. The silex group has an existing European subsidiary based in Meerbusch, Germany, and silex america and silex europe will work together to create a positive integration of the European business activities to benefit our customers.

The acquisition enables silex technology to offer an even wider product range:

- Internal and external Fast Ethernet Print Servers for USB, Centronics and serial ports
- IBM Token Ring Print Servers
- Serial Device Servers
- USB Device Servers
- WLAN and Bluetooth Connectivity Solutions
- Fibre Optics Connectivity
- BinTec Routers
- TROYgate Internet Access Servers

Furthermore, silex technology offers "private label" and OEM products as well as project based customizations of the standard products.

The sources of supply are the ones you know at silex technology and TROY. We are looking forward to continuing the cooperation with you.
